

# Delaware

Affordable\* Housing Surplus/Deficit\*\*  
by Census Tract

Affordable\* Housing Surplus/Deficit\*\* (Adjusted)\*\*\*  
by Census Tract

Source: Comprehensive Housing Affordability Strategy (CHAS) dataset, HUD, 2000; data compiled from 2000 U.S. Census.

\*Affordable housing units are considered those affordable to households earning  $\leq 50\%$  AMI.

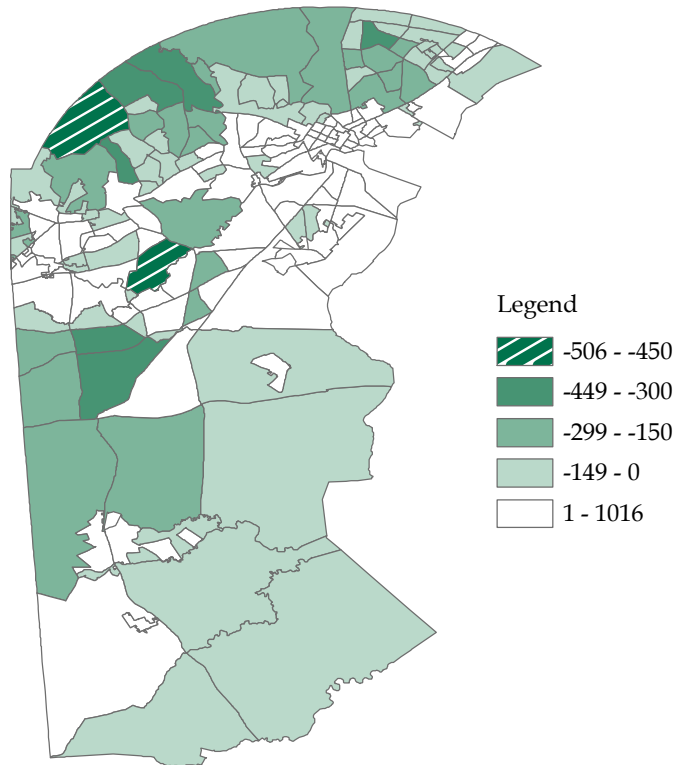

\*\*The Surplus/Deficit of affordable housing units is calculated by subtracting the Proportionate Share from the actual number of affordable housing units. The Proportionate Share is a census tract's proportion of the state's overall housing stock multiplied by the state's total affordable housing need (total number of households earning  $\leq 50\%$  AMI).

\*\*\*Affordable housing units occupied by households earning more than 50% AMI are subtracted from the Surplus/Deficit of affordable housing units to calculate a more accurate measure of the availability of affordable housing units.
